Subject: Sewage Spills in Tega Cay?

What is being done to prevent the persistence of Sewage spills but as well curb the problems our endangered Catawba River and Lake Wylie face?

We now have seen numerous sewage spills this year not to mention the numerous in years past. You then add the continued introduction of PCB's from Duke Energy's plants along with the dumping (then removal) of old asphalt near the Tega Cay beach club, along with run off from the new Fort Mill School and you get a lake and river that is not desirable and toxic.

At what point will there be accountability? This is the water we drink, bathe in and swim in. The Catawba River is one of the most endangered rivers and something needs to be done to protect it.

Concerned citizen and resident,

David Lando
